INTRODUCTION

1. Source of Data

The tourist statistics contained in this report are based on informations gained from disembarcation cards. Disembarcation cards are collected from all travellers upon entry into Nepal at Tribhuvan Airport Kathmandu or at Birgunj border checkpoint. They are handed over to the Department of Tourism after registration by the Immigration authorities.

The foreign exchange statistics relating to tourism are compiled by Nepal Rastra Bank. The corresponding data in this report are originally published in Rastra Bank's Quarterly Economic Bulletins.

2. Definition of Terms

The definitions used in this report's tables are those recommended by the United Nation's Guidelines for Tourism Statistics, New York 1971.

Accordingly, there are no 'excursionists' among the visitors which, in turn, are sorted out of the total number of incoming travellers, but only 'tourists' (visitors staying for one night or more).

As in the past, Indians and Nepalese citizens have not been considered as visitors though they may fulfil the definition's criteria. Therefore, they have not been included in the compilation of data. This gap in the overall statistical system will be closed from 1974 onward.

3. Processing of Data

Compilation of the disembarcation card data of tourists is carried out by the Department of Tourism according to the above mentioned definitions.
